EXPERIENCE

FLUTTER DEVELOPER

Unicornready | May 2024 – Present

- Developed and maintained cross-platform mobile applications using Flutter and Dart.
- Built responsive UIs with Figma, integrated REST APIs, managed local data using Hive, implemented Provider for state management, and contributed to testing, debugging, and performance optimization in collaboration with cross-functional teams.

PROJECT

RIPEFORK : Food Recipe App

- Developed a food recipe mobile application using Flutter and Dart. Integrating the Edamam API for real-time recipe fetching, implementing Provider for state management, and designing a clean, user-friendly interface with Figma.
- Deployed the web app using Firebase Hosting, published the mobile app on the Amazon Appstore, and maintained the source code on GitHub.
